

Procedure Card for IDT4000

ECSTASY/BATH SALTS IDENTIFICATION

Substance Test

As a precaution, gloves and eye protection should be worn when handling drug substances and using test units. Do not prove up part of unit. Do not remove probe once a capsule is broken. In the unlikely event of a spill, rinse affected area thoroughly with water. Keep out of reach of children. All results are presumptive. If necessary, further testing by a competent drug testing jab can provide additional identification.

Powder

Sample suspected substance.

Powder Tablet

With

Touch Smart-Tip™ probe to sample.

Firmly press Smart-TipTM probe on the tablet while scrubbing in a circular motion until the tip is completely covered with substance.

Do not continue unless probe is locked below the Flex Pins and cannot e removed from the Identification

thumb

G e n t l y shake test unit for 2-3 seconds.

.

The appearance of a violet color strongly indicates the presence of **Ecstasy/MDMA** or its analogues. The color may take up to 3 minutes to develop.

* The color may take up to 5 minutes to develop.

The appearance of a yellow color indicates the presence of Bath Salts such as **MDPV**, **Methylone** or **Butylone**.

If none of the above colors develop, the above listed drugs are <u>not</u> present.

Proceed to Dilution (steps 6-9), regardless of whether or not a color appeared.

Results

Gently shake test unit for 2-3 seconds.

Wait 5 minutes.
The test window will warm up.
This is normal.

Dilution

With thumb and forefinger, squeeze chamber 3 until capsule breaks.

9

Gently shake test unit for 2-3 seconds.

The test window will warm up.
This is normal.

Disposal

After Dilution, the test kit is safe to dispose of in the trash.
