

RSID FIELD KITS

Designed for Crime Scene Investigation
Designed to withstand extreme temperatures (-23°C to 48°C)

The RSID™- Saliva, Semen and Blood Field Kits are designed for fast, easy and reliable detection of specific human fluids from a variety of samples encountered at crime scenes.

Kits don't require refrigeration or special temperature storage. As these are used for crime scene investigations, they are designed to withstand extreme temperatures (-23°C to 48°C).

Components of the Kit:

- 10 Strip Tests RSID™ Saliva or RSID™ Semen or RSID™ Blood
- 10 Extraction/Running buffer tubes – pre-loaded
- 10 Transfer Pipettes – Disposable single-use
- Cotton swabs
- DNA Free Water for wetting swabs
- Stain sampling/cutting protocol and forensic sample extraction method
